Summary

Web & Digital Designer with front-end development experience, focused on designing, building, and maintaining high-impact websites and digital tools for marketing, operations, and customer-facing teams. Known for translating complex workflows into clear, usable interfaces and shipping responsive, accessible solutions in real-world business environments.

Experience

Digital Operations & Web Designer

Quick Cleaners & Laundry | Jan 2025 – Present

- Designed, built, and launched the company's customer-facing website, improving clarity, mobile usability, and customer self-service.
- Implemented new business software, including automated SMS and email notifications, reducing manual customer communication and improving response time.
- Streamlined digital workflows across scheduling, customer updates, and internal operations to support efficient day-to-day business performance.

Software & UI Developer Intern

Midwest Engineered Systems | Aug 2024 – Jan 2025

- Designed and developed interactive HMI/SCADA interfaces in Ignition and FactoryTalk for high-constraint, safety-critical industrial environments.
- Built custom dashboards and integrated real-time PLC data streams to enable responsive controls and faster operational decision-making.
- Translated complex automation logic into intuitive visual behaviors, reducing operator cognitive load and improving accuracy.
- Partnered with engineers on device configuration, system testing, and troubleshooting to ensure reliable performance across deployed systems.

Digital Content Producer

LVN Ventures | Jun 2021 – Aug 2022

- Designed seasonal catalogs, flyers, and product cards to support sales teams with clear, consistent product communication.
- Produced and edited product photography for use across digital and print channels.
- Maintained and updated company websites by uploading products, refreshing content, and supporting ongoing site updates.
